You should take a test as quickly as possible. Test possibilities in Innsbruck can be found on the last page.

POSITIVE TEST:

If you have the virus, you must-self isolate for ten days from the first symptoms. All further steps will be coordinated with the local health authorities. After 5 days of quarantine, if you have no more symptoms your quarantine is eased: You are then allowed to travel and go outside, but only to places that are not crowded and where a FFP2 mask can be worn at all times.

If you still have symptoms after 5 days, you continue your quarantine until the 10 days are over or you can take a PCR test, if it is negative, your quarantine will be ended.

CONTACT PERSON:

- Persons who had face-to-face contact or were in the same room with a confirmed case for ≥ 15 minutes at a distance ≤ 2 metres
- Household contacts (people sharing a room/flat)
- Persons with the following types of contact in long-distance transport such as airplane, coach or train:
 - Direct seat neighbours of the confirmed case
 - Crew members or other passengers if one of the other criteria applies
- Persons who were exposed with high probability to a relevant concentration of aerosols, regardless of the distance to the confirmed case (e.g. partying)
- Persons who had direct physical contact (e.g. shaking hands) with a confirmed case

Rules for Contact Person:

Rules for Contact Persons depend on your status of vaccination/recovery:

1. If you are fully vaccinated (3 shots / 2 shots in case of Johnson) and/or recovered from Covid in the last 3 months, legally, you do not need to take any measures if you are a contact case. However, we still ask you to wear a FFP2 mask at all times if you find out you have been in close contact with an infected person to protect others.
2. If you are not fully vaccinated and have been in close contact with an infected person, you need to minimize your contacts immediately and face restrictions: Do not go to events / restaurants / bars / avoid public transport & wear a FFP2-mask while you are not in isolation. These measures can be lifted on the 5th day after having a negative PCR test result.

In any case (symptoms or positive test) the team manager has to inform immediately the COVID-19 Outbreak Response Coordinator Doctor and the Technical Delegate.
The person suspected must be immediately placed in a separate room and kept away from the event.
