SUSTAINABILITY CONSIDERATIONS

The competition takes place in a green environment at the foot of the Picos de Europa. The Picos de Europa are an entrance to one of the most emblematic mountains of the country, so the control of garbage, pollution and space will be essential.

Transport:

The travel company will be responsible for grouping competitors and technicians in buses and vehicles to avoid the overcrowding of cars on site. Attempts will be made to ensure that these vehicles are labelled with low pollution.

You can also rent electric cars in the multiple options provided at airports. All companies have environmentally efficient car options at the multiple airports nearby. For example:

Booking: [Link](#)

Accommodation:

We recommend competitors and technicians to rent the room in one of the two hotels or in the campsite that is a minute walk from the competition. In this way, the traffic of vehicles will be minimal equal to their pollution.

Food:

In Fuente De there are three options of on-site restoration with healthy food and respectable with the environment.

At the venue:

We will use a generator to provide light to the competition and we recommend people to use the garbage containers that will be distributed throughout the area

ACCOMODATION

Fuente De is a small place with few accommodations, this year we've reached an agreement with an agency for all the bookings. You can book all the rooms here:
